VISUAL IDENTITY · ICONOGRAPHY

Icon library

The complete icon set for the Foundation: one consistent line language across departments, programmes and platforms.

ABOUT THE LIBRARY

One line language, four variants

The library brings the Foundation's iconography together in one consistent, outlined style with a stroke weight of *1.5*. Every icon appears in four variants, so it rests just as calmly on a light sand surface as on a saturated blue field.

Two variants stand without a ring, and two are carried by the round field from the Foundation's brand symbol, where the filled circle meets the icon frame at all four corners.

How to read the four variants

The two variants without a ring sit directly on surfaces; the two with a ring carry the Foundation's circular symbol as a backing field. The white variant is shown on dark grey (#413C41), as it is intended for dark surfaces.
